

Comic Craft AI

AI-Powered Comic Adventure Generator

Automatically creates comic stories from user ideas

Generates characters, scenes, dialogues and visual panels

Produces a complete comic preview and PDF

Problem Statement

- ✓ Creating a comic manually requires significant time and effort.
- ✓ Users need separate skills for story writing, illustration, character design and layout.
- ✓ Beginners may find it difficult to convert their ideas into complete comic panels.
- ✓ Existing tools often require multiple applications for writing and designing.
- ✓ There is a need for a simple AI-based system that can generate a complete comic from a user-provided idea.

Proposed Solution

Comic Craft AI

- ❑ User enters a story idea, character, setting, tone and art style.
- ❑ AI generates a structured comic story.
- ❑ Each story section is converted into an image-generation prompt.
- ❑ AI generates individual comic panel illustrations.
- ❑ The system combines the panels into a complete comic layout.
- ❑ The final comic can be previewed and exported as a PDF.

Technology

▶ Frontend

- ✓ HTML
- ✓ CSS
- ✓ Jinja2 Templates

▶ Backend

- ✓ Python
- ✓ Fast API
- ✓ AI Technologies
- ✓ Generative AI for story generation
- ✓ AI image generation for comic panels
- ✓ Libraries / Tools
- ✓ Google Gemini API
- ✓ Stability AI API
- ✓ Pillow
- ✓ Report Lab
- ✓ Uvi corn
- ✓ Development Environment
- ✓ Visual Studio
- ✓ Code
- ✓ Python
- ✓ REST API

Features

- ▶ Story Idea Input
- ▶ AI Story Generation
- ▶ Character-based Story Creation
- ▶ Automatic Panel Generation
- ▶ AI-generated Comic Illustrations
- ▶ Custom Art Style
- ▶ Different Story Tones
- ▶ Comic Preview
- ▶ Multiple Panel Support
- ▶ PDF Export
- ▶ Browser-based Interface

Demonstration

- ▶ **Step 1:** User enters the story idea.
- ▶ **Step 2:** The system generates the story outline.
- ▶ **Step 3:** AI creates the complete story and divides it into panels.
- ▶ **Step 4:** Image generation API creates an illustration for each panel.
- ▶ **Step 5:** Generated images are combined into a comic layout.
- ▶ **Step 6:** The final comic is displayed in the browser.
- ▶ **Step 7:** User can export the completed comic as a PDF.

Future Changes

- ▶ Support for multiple AI image-generation models
- ▶ Better character consistency across panels
- ▶ Automatic speech bubble placement
- ▶ More comic styles and art styles
- ▶ Voice-based story input
- ▶ Multilingual comic generation
- ▶ Mobile application
- ▶ Cloud-based comic storage
- ▶ User accounts and comic history
- ▶ Higher-resolution image generation
- ▶ Automatic background and character customization
- ▶ Project Development Phases

conclusion

- ▶ ComicCraft AI makes comic creation simple, fast, and creative using Artificial Intelligence.
- ▶ It can generate stories, characters, dialogues, scenes, and comic panels from a simple user idea.
- ▶ It also provides a comic preview and PDF export.
- ▶ In the future, it can support more art styles, languages, voice input, and mobile applications.
